

- Glycera, on the British species of, 147.
- Gœppert, Prof., on the fossil Cycadeæ found in Silesia, 442.
- Goliathus, description of a new species of, 39.
- Gomposcephalus, new genus of, 39.
- Goodsir, H. D. S., on some animals found amongst the gulf-weed, 73; on a new species of Nymphon, 293; on some gigantic forms of invertebrate animals from the coast of Scotland, 377.
- Goodsir, John, on the electric organs of the Rays, 122.
- Gould, J., on a new species of Platycercus, 114; on new animals and birds from Australia, 129, 142.
- Grasses, on the import of the inferior paleæ of, 174.
- Gray, J. E., on the animal of Spirula, 257, 444.
- Griffiths, W., on the Rhizanthææ and their allies, 190; on the ovulum of Santalum, 196; on the development of the ovulum in Avicennia, 197; notice of the late, 447.
- Grisebach, Dr. A., on the occurrence of Phytozoa in phanerogamous plants, 264.
- Gulf-weed, on some animals found amongst the, 73.
- Gulliver, George, on the blood-corpuscles of the two-toed sloth, 122.
- Habenaria, new species of, 386.
- Hæmatococcus sanguineus, notice respecting, 372.
- Hancock, A., on the anatomy of Eolis, 1, 77; on the boring apparatus of the carnivorous gasteropods and of the stone- and wood-burrowing bivalves, 113.
- Hanley, S., on some new species of Tellina, 46, 363, 435; on new species of Cytherea, 133; on new species of Cyrena, Venus and Amphidesma, 431.
- Hapalotis, new species of, 130.
- Henfrey, A., on the causes of the ascent of the sap in plants, 424.
- Heron, Sir R., on the habits of jerboas, 286.
- Hesperomys, new species of, 428.
- Hinds, R. B., memoirs on geographic botany, 11, 89; on some new species of Marginella, 50; on some new shells, 123; on a new species of Solarium, 374.
- Hippolyte ensiferus, description of, 74.
- Hipposideros, observations on the genus, 469.
- Hodgkinson, Mr., on the food of the Australian natives, 70.
- Hodgson, B. H., on the rats, mice, and shrews of Nepal, 266; characters of six new species of Nepalese birds, 326.
- Hogg, J., on the Spongilla fluviatilis, 284.
- Homoptera, descriptions of new genera and species of, 34, 119.
- Humboldt, M. von, on Ehrenberg's researches on Infusoria, 141.
- Hybosorus, new species of, 439.
- Hydractinia, observations on the, 248.
- Hylobates, observations on some species of, 449.
- Hypsiprymnus, new species of, 130.
- Idalia, observations on the genus, 262.
- Ieracidea, new species of, 132.
- Infusoria, observations on, 141; on the occurrence of some rare species of, 371.
- Infusorial deposits in America, 214.
- Insects, descriptions of new, 34, 38, 108, 119, 439; on the means by which they walk on the vertical surfaces of highly polished bodies, 115; on the reproduction of lost parts in, 279.
- Invertebrata, descriptions of new British, 377.
- Ireland, contributions to the fauna of, 270, 308.
- Ischadites Kœnigii, observations on the, 406.
- Jerboas, on the habits of, 286.
- Jerdon's Illustrations of Indian Ornithology, reviewed, 274.
- Johnston, G., on the British Annelides, 145.
- Kaup's, J., Classification der Säugethiere und Vögel, 422.
- King, W., on a British shell of the genus Circe, 112.
- Kützing's Kieselschaligen Bacillarien oder Diatomeen, reviewed, 185.
- Landsborough, Rev. D., account of a dredging excursion, 251; on some rarities found on the west coast of Scotland, 327.
- Laplanders, on the crania of the, 287.
- Lasègue's, M., Musée Botanique de M. Benjamin Delessert, noticed, 421.
- Lastrea spinosa and L. multiflora, on the correct nomenclature of, 322.
- Lathræa clandestina, anatomical researches on, 410.
- Leaves, on the decurrence of, 415.
- Lee, H., on the abundant occurrence of rare infusoria in the scallop, 371.
- Leech, on the structure of the cocoon of a, 301.
- Leefe's, Rev. J. E., Salicium Britannicum exsiccatum, noticed, 275.
- Leiothrix, new species of, 326.
- Lemuridæ, observations on some, 461.
- Lentinus, new species of, 424.
- Leptopus, characters of the new genus, 430.

- Lindley, Prof., on new genera and species of orchidaceous plants, 106, 256, 383.
- Link, M., on the origin of the corms of *Colchicum*, 214.
- Linnæan Society, proceedings of the, 190, 284, 423, 495.
- Lophyrus, new species of, 360.
- Loris, on the habits of the, 59.
- Lycaste, new species of, 383.
- Macacus, new species of, 457.
- M<sup>c</sup>Calla's, W., *Algæ Hibernicæ*, noticed, 189.
- M<sup>c</sup>Coy, F., contributions to the fauna of Ireland, 270.
- M<sup>c</sup>Nab, J., account of a botanical tour through part of the United States and Canada, 64, 351, 353.
- Macropus, new species of, 129.
- Main, J., remarks on vegetable physiology, 198.
- Malurus, new species of, 133.
- Mammalia, descriptions of new, 129; on the classification of, 422; observations on some, 427; notes on various, with descriptions of new species, 449.
- Marginella, new species of, 50.
- Martius, M. von, on the growth of the stem of palms and on the decurrence of the leaves, 415.
- Masdevallia, new species of, 256.
- Maxillaria, new species of, 383.
- Medusa proboscidalis, observations on the, 196.
- Megascolex, on a new species of, 60.
- Melanogaster, on a new British species of, 41.
- Meteorological observations, 71, 143, 215, 295, 375, 447.
- Mice of Nepal, descriptions of the, 266.
- Microscope, on the preservation of objects of natural history for the, 104, 242.
- Microstylis, new species of, 256.
- Milne Edwards, M., on some submarine explorations by, 68.
- Miscellanea Zoologica, 145.
- Mitra, new species of, 477.
- Mohl, H. von, on the import of the inferior paleæ of the grasses, 174; on the penetration of the cuticle into the stomata, 217.
- Mollusca, littoral, on the laws which regulate the geographical distribution of, 42.
- Mollusca, new species of, 311.
- Mollusca nudibranchiata, anatomy of, 1, 77.
- Morris, J., on the occurrence of *Pollicipes* in the Oxford clay, 30; on some new species of *Ancyloceras*, 31.
- Murex saxatilis, on the growth of, 140.
- Mus, new species of, 266.
- Muscicapa, new species of, 128.
- Muscle, on the structure of the ultimate fibre of the, 279.
- Myadora, monograph of the genus, 61.
- Myriapoda, on the reproduction of lost parts in, 279.
- Mystropetalon, observations on the genus, 193.
- Nautilograpsus minutus, description of, 73.
- Neæra, new species of, 125.
- Nemertes, new species of, 378.
- Nereides, on the British, 145.
- Newport, G., on the reproduction of lost parts in Myriapoda and Insects, 279, 373; on the structure and development of the blood-corpuscle in Insects, 281; on the destruction of the orange-trees in the Azores, 294.
- Nymphon, on a new British species of, 293.
- Octodon, new species of, 428.
- Odontoglossum, new species of, 256.
- Odostomia, new species of, 315.
- Oncidium, new species of, 383.
- Orchidaceæ, new genera and species of, 106, 256, 383.
- Oreocinclæ, new species of, 326.
- Orplnus, new species of, 441.
- Owen, Prof., on the *Dicynodon*, 138; on certain Belemnites from the Oxford clay, 277.
- Pachycephala, new species of, 133.
- Palæmon natator, description of, 74.
- Palms, on the growth of the stem of, 415.
- Parus, new species of, 326.
- Peach, C. W., on the "Nigger" or "Cotton-spinner" of the Cornish fishermen, 171; on the development of *Doris*, 445; on the nidi of *Buccinum reticulatum*, 446.
- Pecten, on a new British species of, 250.
- Peramcles, new species of, 130.
- Phæocordylis, characters of the new genus, 194.
- Plasogale, new species of, 131.
- Phytozoa, on the occurrence of, in phanerogamous plants, 264.
- Plants, on the geographical distribution of, 11, 89; on some rare British, 139; on the stigma of, 193; on the movement of the sap in, 198, 424; on the occurrence of Phytozoa in, 264; on the nutrition of, 350; on the structure of certain tissues in, 495.
- Platner, E. A., on the formation of capillaries, 372.
- Platyercus, on a new species of, 114.
- Pleurothallis, new species of, 384.
- Pleurotoma, new species of, 316.
- Podiceps, new species of, 142.

- Pœciloptera, new species of, 36.  
 Pollicipes, on the occurrence of, in the Oxford clay, 30.  
 Polypes, observations on some, 69.  
 Ponthieva, new species of, 385.  
 Portlock, Capt., on the ova of the large spotted dog-fish, 261, 345; on the genus *Cardinia*, 343.  
 Prescottia, new species of, 386.  
 Priapulus, new British species of, 272.  
 Prichard, Dr., on the crania of the Laplanders and Finlanders, 287.  
 Prinia, new species of, 126.  
 Prionidæ, new genus of, 108.  
 Quatrefages, M. de, on the anatomy of some Mollusca nudibranchiata, 2.  
 Quekett, E. J., on the examination of some fossil woods, 495.  
 Rafflesiaceæ, on a new genus of, 191.  
 Ralfs, J., on the British Desmidiæ, 149, 401.  
 Ranella, new species of, 360.  
 Rats of Nepal, descriptions of the, 266.  
 Rays, on the existence of an electric apparatus in, 121, 122.  
 Reckitt, W., on the preservation of objects of natural history for the microscope, 242.  
 Reeve, L., on the genus *Myadora*, 61; on new species of Tritons, 199; on new species of *Ranella*, 360; on new species of *Arca*, 355; on new species of *Mitra* and *Cardium*, 475.  
 Reid, Dr., observations on some Polypes, 69.  
 Rhinolphus, new species of, 466.  
 Rhizanthæ, observations on the, 190.  
 Richardson, J., generic characters of *Gasterochisma melampus*, 346.  
 Ringicula, new species of, 123.  
 Rissua, new species of, 315.  
 Robert, E., on the occurrence of the *Anoplotherium* in the lowest layers of the tertiary period of the Paris basin, 141.  
 Royal Institution, proceedings of the, 210.  
 Royal Society, proceedings of the, 277.  
 Royal Society of Edinburgh, proceedings of the, 121.  
 Rubus, on three new British species of, 305.  
 Salix, observations on some British species of, 276.  
 Salter, T. B., on three new species of *Rubus*, 305.  
 Santalum, on the ovulum of, 196.  
 Sapria, characters of the new genus, 191.  
 Scenedesmus, on the British species of, 401.  
 Schomburgk, Sir R. H., on the geology of British Guiana, 137.  
 Scotland, on some rarities found on the west coast of, 327.  
 Scyllium Catulus, on the ova of, 261, 345.  
 Sedum amplexicaule, on the formation of aerial tubers in, 408.  
 Seller, Dr., on the nutrition of plants, 350.  
 Semnopithecus, observations on some species of, 452; on two new species of, 497.  
 Serpenteria, characters of the new genus, 377.  
 Shells, new, 46, 50, 61, 123, 133, 135, 199, 250, 315, 355, 360, 363, 374, 431, 435, 475.  
 Shrews of Nepal, descriptions of the, 266.  
 Siebold, Dr., on the metamorphoses of the Strepsiptera, 293.  
 Silphodes, new species of, 440.  
 Simiadæ, notes on various, with descriptions of new species, 449, 497.  
 Smith, J., on the geology of Gibraltar, 67.  
 Smyth, W. W., on the geology of the country round the mines of the Taurus, 212.  
 Solarium, new species of, 374.  
 Sonder, W., on some British species of willows, 276.  
 Sorex, new species of, 269.  
 Sowerby, G. B., on new species of *Voluta*, 135.  
 Spiders, on the means by which they walk on the vertical surfaces of highly polished bodies, 115.  
 Spiral vessels, on the structure of, 495.  
 Spirula, on the animal of, 257, 444.  
 Sponge, description of a new genus of, 297.  
 Spongilla fluviatilis, remarks on the, 284.  
 Stark, Dr., on the existence of an electric apparatus in the flapper-skate and other rays, 121.  
 Staurastrum, on the British species of, 149.  
 Stelis, new species of, 385.  
 Stenorhynchus, new species of, 386.  
 Sterna leucoptera, occurrence of, in Britain, 271.  
 Stomata, on the penetration of the cuticle into the, 217.  
 Strepsiptera, on the metamorphoses of the, 293.  
 Strickland, H. E., on some new species of birds from Western Africa, 125; on *Cyanocitta*, a proposed new genus of *Garrulinæ*, 260, 342.  
 Syllis, on the British species of, 145.  
 Synhydra, observations on the genus, 244.  
 Syrix, new British species of, 272.  
 Syrix papillosus, notice respecting, 329.  
 Taphozous, new species of, 472.
